Assignment 1 Grading Guidelines

- JSON file generated in Task 1 while scraping your assigned search engine and must contain the following:

    - 100 queries.

    - Each query having 10 valid results that include valid URLs. (**5 points**)

- CSV file of final results after determining relevance between your assigned search engine and Google reference dataset provided by us. File is submitted with a list of the queries, the number of overlapping results, the percent overlap and the Spearman coefficient. Average for all are contained at the bottom (**4 points**)

- TXT file that in one paragraph summarizes, over the 100 queries that you ran, how similar your search engine performed relative to Google. (**1 point**)

- The three files should be named:

    hw1.json, hw1.csv, hw1.txt
